

Retractable Window Awnings

Exterior Solar Solutions:

Mariak's Retractable Window Awning is one of the most robust and effective exterior shading systems available. This unique system is specifically engineered to reduce the amount of sunlight and solar heat entering a room. The Retractable Window Awning is designed for windows and is not intended for use with doors. It features spring loaded awning arms that drop and pivot from the midpoint of the window. This flexibility allows the awning to project from vertical (up against the wall) down to approximately 130-degrees. Because the Retractable Window Awning can stop at any desired position, it offers the perfect combination of outward visibility and sun protection.

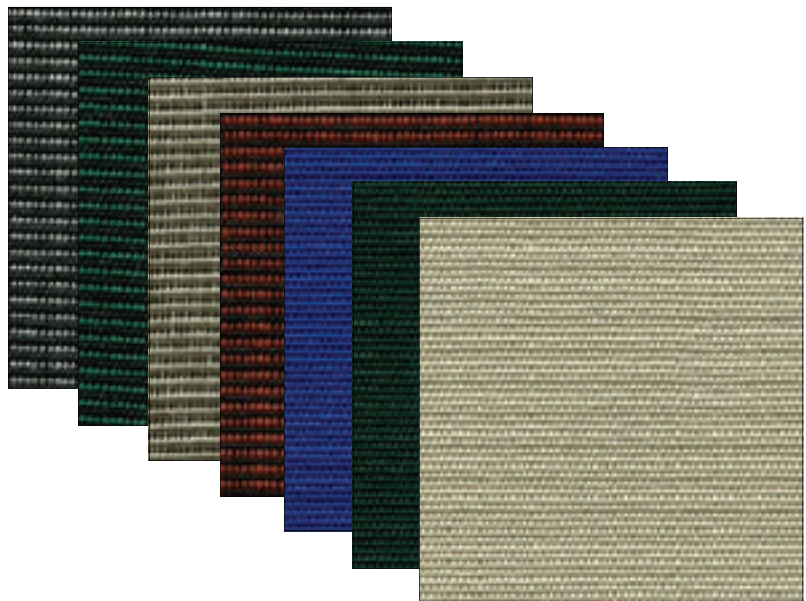

Features & Options:

- Manual crank or motorized with hand held remote control transmitter
- Spring tensioned pivoting arms with 2ft, 3ft, and 4ft projections
- Arms rotate almost flat against the wall for maximum shading & privacy
- 4" x 5" aluminum painted headbox available as white, beige, and bronze
- Hem Option of straight or scalloped
- Prevents fading of interior furnishings
- Can be retracted up completely out of view from the interior
- All stainless steel fasteners
- Headbox uses snap-in installation brackets for quick & easy installation
- Fabrics are all 100% Solution Dyed Acrylic (Awning/Marine Grade)
- 7 Year Limited Lifetime Warranty (Best available on the market)

Retractable Window Awning Exploded Diagram

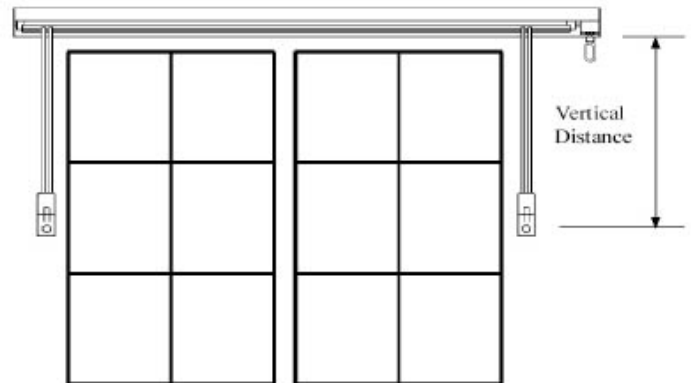

Retractable Window Awning Installation Instructions

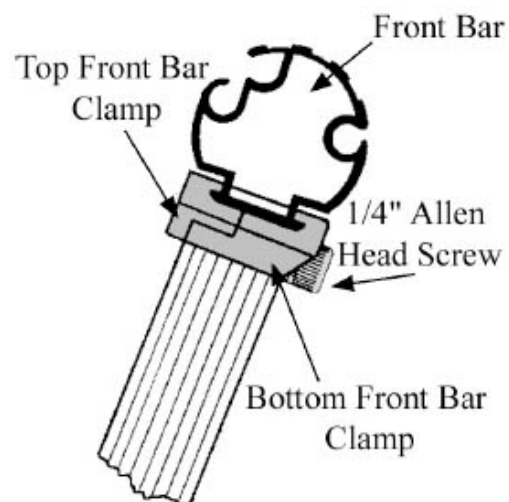

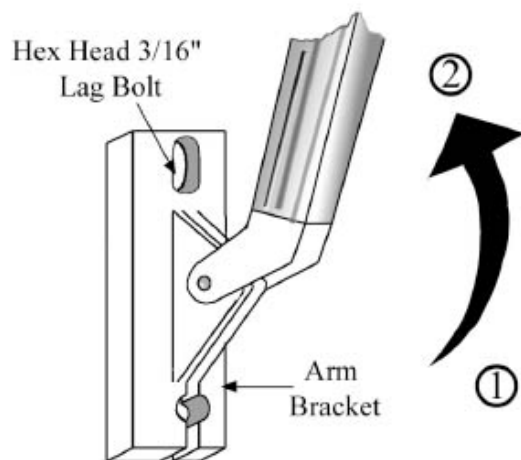

- Retractable Window Awning installations require 4" of vertical space.
- Slightly loosen the headbox retaining bolt and remove the installation brackets from the headbox.
- Attach headbox installation brackets 4" to 6" above the window by screwing them into the exterior wall of the house or building with the 1/4" lag bolt included.
- Set the headbox down into the headbox installation brackets. Slide the headbox (hood) retaining bolts into the installation bracket notch, and tighten the bolts to secure the headbox.
- Using the table below, find the proper vertical distance for mounting arm brackets. (Note: If awning is over 10 ft wide, a third arm will be required).

Arm Size	Distance
2 Ft	22"
3 Ft	34.5"
4 Ft	46.5"

- Secure awning arm brackets to the wall with the 3/16" lag bolts provided. Bend awning arms upright to come in contact with the awning front bar. Attach the arm clamps to the awning front bar and secure with the 1/4" Allen head screws provided.

Retractable Window Awning

Retail Price Chart

Drops	Awning Width				
	5'-0" ¹	7'-6" ¹	10'-0" ²	11'-6" ³	15'-0" ³
2' Arm (4' Drop Window)	\$880	\$1,012	\$1,209	\$1,298	\$1,535
